Gilbarco® FlexPay™ Secure Card Reader (SCR)

In today's world, fraud is a major concern to you and your customers. Gilbarco Veeder-Root can help. We're the global leader in outdoor payment systems.

Our FlexPay Secure Card Reader provides double protection at the forecourt with both physical security and electronic data encryption at the card reader.

FlexPay Secure Card Readers are modular to provide affordable upgrades and protect your customers' personal transaction information from the risk of fraud at the dispenser.

Let your customers know it is safe to do business at your site.

The FlexPay Secure Card Readers feature:

- > Anti-skimming shield
- > Four-point security protection
- > Tamper-resistance
- > Single Data Encryption Standard (SDDES) communication
- > Contactless capable

Four point security protection

FlexPay Secure Card Readers protect the four most vulnerable points from fraud activity:

- > Communication - SDES encryption with potential future upgrade to Triple Data Encryption Standard (TDES)
- > Physical - 5 sensor points to detect tampering
- > Environment - voltage, UV, and temperature
- > Memory - battery back-up

Eliminates your risk for fraud

Protect your customer information and payment data at the fueling island — Let your customers know it is safe for them to do business at your site.

Integrates seamlessly

It was designed specifically for Gilbarco® dispensers. So you not only maintain the look of your dispenser, but also the approvals and warranties.

Scalable

Upgrade your services by adding contactless when your business is ready.

Works with any Gilbarco dispenser

It is available with factory installation for the Encore® S and 300 dispensers, and as a retrofit for the entire Encore® line, The Advantage®, and Eclipse® models.
